- Pre-set adjustment allows for easy installation
- Human error is virtually eliminated in bearing adjustment
- Five-year or 100,000 mile limited warranty

What is Nev-R-Lube?

Dexter's Nev-R-Lube™ bearings are comprised of opposed tapered roller bearing cones sealed inside of a precision ground, one piece double cup arrangement. These bearings are designed with a small amount of axial end play. The end play is essential to the longevity of the bearing's service life.

Nev-R-Lube Availability

42mm Cartridge: For use on D52 and D60 leaf spring (straight spindles only) axles and #11 & #12 Torflex® axles up to 6,000 lbs. These axles are equipped with 6 on 5.50" bolt circle hub-drums and 12" x 2" brakes. Use only zero offset wheels on these axles.

50mm Cartridge: For use on D70 and D80 leaf spring axles and #12 & #13 Torflex® axles up to 8,000 lbs. These axles are equipped with 8 on 6.50" bolt circle hub-drums and 12" x 2" or 12-1/4" x 3-3/8" brakes. Can be used with zero to 1/2" inset wheels at 7,000 lbs. ratings. Zero offset or .19 inset only at 8,000 lbs. capacity.
