# JACKS • HYDRAULIC JACKS

Precision 7K Hydraulic Jack designed for bumper hitch trailers applications.

**FEATURES:**

- Center Mounted Hydraulic Ports for fast, easy installation
- Bolt-On Ready
- Painted Black
- Power Up / Power Down
- Universal Mounting Bracket
- 24" Travel Distance
- Removable Foot

Removable Foot - Hose Ports & Plate - Plug into Hydraulics

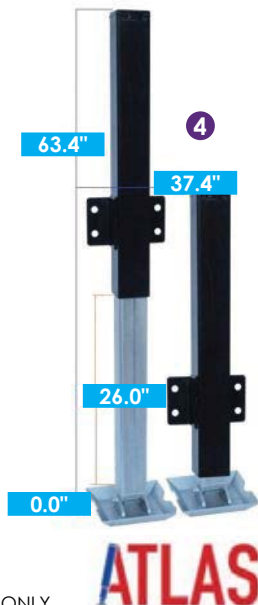

**HYDRAULIC JACKS**

\* Designed to accept all pump manufacturers up to 3,200 psi.

**1 - For trailers with existing hydraulics. 2 - For trailers without hydraulics. 3 - Bolt-on and power up.**

**Stillwell Jacks Atlas Hydraulic Jack** is designed for rugged light and medium duty trailer users. The world's fastest and most affordable hydraulic jack that's flexible enough to work with nearly any trailer design for a wide range of environments.

**FEATURES:**

- 26" of Power Up / Power Down Travel.
- Swivel foot ensures solid ground contact.
- Guide bearings eliminate metal on metal friction and galling.
- Designed to easily tie into existing truck or trailer hydraulics.
- Bolt on or Weld on applications.
- Available in jack leg only or as all-in-one **Atlas Backpack Jack** with enclosed Bucher Hydraulic Pump with 10K lifting force. Also includes 15' corded remote controller. Powder coated steel cover and standard universal mounting brackets.
- Battery power cords require separate purchase: 7000925 & 7000926.

TWO JACKS ARE SHOWN ONLY FOR ILLUSTRATION.

## Pipe Mount Trailer Jacks

Pipe or tube is welded to the trailer frame, providing a mount for the jack to pivot - down for jacking and stabilizing, and up for towing.

- Capacity: 2,000 - 7,000-LBS
- Pivots around a tube that is welded to the trailer frame
- Comes in two styles - top crank or side wind crank
- Held in up or down position by pin
- Mounted typically on the trailer tongue but often found at side of frame to aid in stabilizing and leveling
- Usually 10" or 15" Lift

## Pull Pin Swivel Trailer Jacks

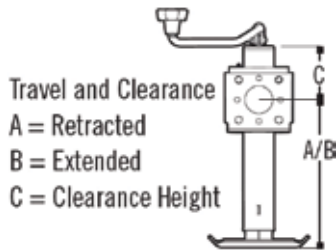

Pull Pin swivel jacks bolt on or weld on to the trailer frame, providing a mount for the jack to pivot - down for jacking and stabilizing, and up for towing.

- Bolt On Style fits frame sections up to 3" Wide x 5" Tall
- Weld On Style mounts to frame in any convenient location
- Pull pin holds jack in position - pin is pulled to release jack for changing positions
- Capacity: 2,000 - 7,000 -LBS
- Comes in two styles - top crank or side wind crank
- Held in up or down position by pin
- Usually 10" or 15" Lift

## Pull Pin Swivel Marine Trailer Jacks

Pull Pin swivel marine jacks typically bolt on to the trailer frame, providing a mount for the jack to pivot - down for jacking and stabilizing, and up for towing.

- Bolt On Style fits frame sections up to 3" Wide x 5" Tall
- Pull pin holds jack in position - pin is pulled to release jack for changing positions
- Capacity: 800 - 2,500 -LBS
- Typically side wind crank style
- Usually zinc coated for extra corrosion resistance from salt water exposure
- Held in up or down position by pin
- Most common fixture is a caster or double casters
- Usually 10" or 15" Lift

# JACKS • DROP-LEG JACKS =

## Drop-Leg Trailer Jacks

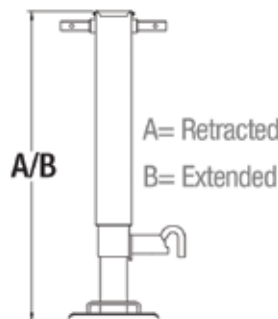

- Either welded or bolted to side of the trailer tongue or most forward cross member.
- Capacity: 5,000 - 12,500 - LBS.
- Typical Applications: Agricultural, Industrial and Construction.
- Square cross section offers improved side-load strength over other designed jacks.
- Drop-leg features enable fast leveling and increased lift abilities.
- Saves time when raising and lowering:
  - Pull the drop leg extension retaining pin to adjust the inner leg and foot.
  - Align holes of the inner and outer drop-leg tubes, reinsert pin to secure the desired height.
  - Crank the jack to raise or low the trailer. NOTE: Because of the drop-leg feature the required cranking is reduced.
- Some Brands and Models can be paired with a second jack (slave) that will work together in tandem enabling a higher capacity lift. Additionally, some Brands and Models can be equipped with an electric motor added convenience.
- Lift varies between 18" - 32" depending upon drop-leg length and travel of the selected jack.

**• 12K HOLD**  
**• 10K LIFT**

While it is NOT a Drop-Leg Jack, the **Stillwell Atlas Hydraulic Jack** is designed for rugged light and medium duty trailer users. The world's fastest and most affordable hydraulic jack that's flexible enough to work with nearly any trailer design for a wide range of environments. See page F-2 for details.

POWER DRIVE KIT FOR MEDIUM DUTY BULLDOG JACKS

## HIGH SPEED VELOCITY SERIES

- Fits a variety of applications for OEM and Aftermarket Industrial, Horse & Livestock, and RV Applications.
- Easy to install – Mounts without welding and requires no hydraulic oil, hoses, or pumps.
- Fully Powered – 12,000 lbs. capacity per leg with Proprietary high-speed system.
- 24" of travel.
- Includes wired remote.
- Resists corrosion with premium powder coat finish.
- Manual override in case of power loss.
- 5 year limited warranty.

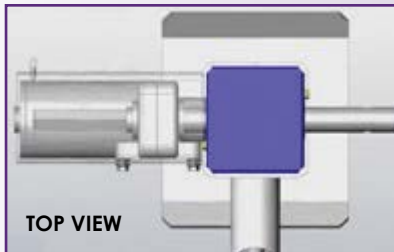

•7950603

## POWERED DRIVE KIT

7,500 LB. LIFT CAPACITY

### LIFTS 50% MORE THAN THE COMPETITION

- Lifts 3" per minute at typical working loads
- Can be manually cranked in power loss
- State of the art 12VDC electric motor
  - Quiet operation – 50% quieter than competitive units
  - Efficient use of electrical power – 60% more effective than competitive units
  - Permanently lubricated to provide years of maintenance free use
- Custom designed wiring harness and rocker switch enclosed in a weather proof box
  - Utilizes a 25 amp circuit breaker with push button reset feature
- Can be used in both single and tandem jack applications
- Kit includes all necessary components for ease of installation
  - Power drive assembly
  - Torque stop tube with energy absorption device
  - Terminal box
  - Wiring harness and switch box
  - Hex coupling (required when using in a tandem jack application)
  - Weather resistant cover

- DESIGNED SPECIFICALLY FOR USE WITH BULLDOG 12,000 LB. JACKS

# JACKS • POWER DRIVE KITS | RACK & GEAR

## Power Drive Kit For Medium Duty Bulldog & Holland Jacks

The Magnum Electric Lift is an easy upgrade, designed to convert your manual jack into a power jack capable of lifting up to 6,500 lbs. of jack weight at 7" per minute. Comes complete with everything you need for easy installation. The motor has a built-in manual crank override in case of battery failure. The Magnum Electric Lift takes the strain out of cranking your trailer with a convenient raise/lower trailer switch.

•7950133

•7950212 & 7950213 KITS INCLUDE: JACK SET, CROSSPIPE, HANDLE AND CLIP.

•IDEAL FOR HORSE, LIVESTOCK & HEAVY DUTY TRAILERS

# TRAILER WINCHES

WINCHES-MOUNTS-RIGGING-WIRING

Not All Winches Are Created Equal!

## ADVANTAGES

BDW Trailer Winches	Other Winches
1) Mounting Plate Included	Mounting Plate Not Included
2) Flat assembly using countersunk hardware mounts to flat trailer deck	Uses hex head mounting hardware which makes mounting on flat trailer deck more difficult
3) Easy rope handling -narrow drum -tensioner	Easy to tangle rope -too much rope -no tensioner
4) Low Profile – 8" or less	Box on top easy to get damaged
5) 20' wired controller & wireless ready	12' wired controller
6) Automatic in-drum load holding mechanical brake	Some winches have dynamic brake which is less dependable

# WINCHES • ELECTRIC WINCH COMPARISON =

## TRAILER WINCHES VS. POWERSPORT WINCHES

**Not All Winches Are Created Equal!**

<span style="font-size: 2em;">+</span> <b>9850175 3.4K Trailer Winch</b> <b>9850172 4.4K Trailer Winch</b>	<b>POWERSPORT WINCHES</b> <span style="float: right; font-size: 2em;">-</span>
All-in-one design - easy to mount	Winch, contactor, & switch are all separate and installer has to mount and wire each separately - difficult to mount
Winch mounts to plate with counter sunk bolts - mounts flat to trailer deck	Uses hex head bolts which will cause problems mounting on flat trailer deck
Includes spring steel tension plate for wire rope - easy rope management and spooling	Tension Plate Usually Not Included - wire rope will unwind off drum when not under tension
20-ft wired controller - use at back of most trailers	Includes handlebar switch or 8 to 12-ft wired controller - not useful for trailers
Fairlead mounts to plate above deck level	Sometimes fair lead is below deck level - causes problems when mounting on trailer deck
Wireless Ready - easy plug-in mount and design for exposed outdoor use	Wireless is hard-wired and not designed for exposed outdoor use
Mechanical brake in drum - better for holding loads	Sometimes dynamic brake - not great for holding loads

## TRAILER WINCHES VS. TRUCK WINCHES

**Not All Winches Are  
Created Equal!**

+ 9850170 5.8K Trailer Winch 9850173 7.8K Trailer Winch	TRUCK WINCHES -
All-in-one design - easy to mount - Includes mounting plate	Most do not include mounting plate - sold separately
Winch mounts to plate with counter sunk bolts - mounts flat to trailer deck	Uses hex head bolts which will cause problems mounting on flat trailer deck
Includes spring steel tension plate for wire rope - easy rope management and spooling	Tension Plate Usually Not Included - wire rope will unwind off drum when not under tension
47 to 55 ft. wired rope on narrow drum long enough for most trailers and make spooling easier / low maintenance	90 to 100 ft. wire rope on wide drum causes lots of problems when used on trailer - rope can bunch up on one end and break winch
Fairlead mounts to plate above deck level	Sometimes fair lead is below deck level - causes problems when mounting on trailer
20 ft. wired controller - use at back of most trailers	Most wired controllers are 12 ft. and not useable on most trailers
Low profile - power unit, motor terminals, & shifter are all mounted low clearance	Most power units, terminals & shifter are mounted on top of winch and its easier to run into and break
Fits inside 20" Box 10" Deep	Requires at least 24" Box 12" Deep
